### Scientific Inquiry Cycle: Review

Science helps us understand and solve problems by developing knowledge and creating things. Often "solved" with a local issue such as water quality or waste management, using science to make or improve solutions can have a positive impact. Understanding the problem fully, including its causes and effects, is the first step in finding an effective solution.

Designing solutions becomes considering various constraints, such as budget, time, and safety concerns. Sometimes, important parts of a solution might be challenging, expensive, or too important to weigh their trade-offs carefully. For example, creating materials for a house that they affect its look and ease of use, cannot influence the effectiveness of the solution.

After identifying a solution, documenting how it works, what constraints affected it, and any compromises that have already been and should involve on the way. Communication, using digital media, and reflecting on the results of the solution are important steps. This process can help sharing ideas locally encourages responsible decision-making and helps communication flow.
