

GST 103: Philosophy, Logic and Human Existence

Peter University Achina/Onneh

First Semester 2024/2025 Session

Lecturer: Rev. Fr Dr Modestus Anyaegbu

Introduction

Philosophy is innate in man and man cannot be fully man if he is not described as rational. Making use of this essential quality of man—rationality, is the business of philosophy. Because man is rational, philosophy helps him acquire the “ability to analyse theories or points of views carefully, to assess arguments critically, to make useful and enlightening connections, and to bring some systematic order to our reflections on deep and important issues.”¹

Philosophy encourages independent, creative and original thinking, and makes use of philosophical methodologies such as analysis, explication, distinction and thought experiment. It will help you to develop strong intellectual muscles which will enable you weigh others’ ideas, analyse and criticise them while articulating and defending your own ideas. This ability serves you well in other disciplines and careers you may choose to pursue in the future.

The aim of this course is to introduce the beginner in a balanced way, to a range of important problems with which philosophy deals and the intellectual tools with which to address those problems. The student is exposed to a battery of philosophical concepts, distinctions and theories that can be expressed by means of those concepts; moreover, the student is expected to be furnished with the wherewithal to address philosophical problems of everyday life and living. In addition to that, the student becomes acquainted with an arsenal of essential terms, distinctions, categories, expressions, and critical questions for encountering problems in other disciplines and in daily living. One of the inevitable philosophical tools and method that will accompany the student in his daily intellectual journey is the tool of Logic. Logic is central to a proper grasp of the ongoing debate about major philosophical problems. A philosopher should be able to employ basic logical methods, “as a matter of first instinct and intellectual habit,” to unravel philosophical issues involving intricate reasoning.

1. Scope of Philosophy—Notions, Meanings:

Philosophy is from the Greek word “philosophia” which reduced to its etymology gives us “philos” meaning “love” (the proper word is ‘philia’) and “Sophia” broadly meaning “wisdom.” *Philosophia* then literally means “love of wisdom.” Sophia had a much broader meaning and application than the ordinary English “wisdom.” Wisdom

Ab l Barak t is often considered one of the most comprehensive philosophers of the Arabic Jewish milieu in the medieval age His extensive and unique philosophical theories especially his theories in the particular sciences were seen as a major challenge for the traditional conceptions of the Aristotelian school of thought during and after this period Ab l Barak t al Baghd d s Scientific Philosophy explores the core material of Ab l Barak t s scientific studies found in his magnum opus the Kit b al Mu tabar The book then locates these scientific theories within Ab l Barak t s philosophy more widely Whilst providing a comprehensive critique of ancient philosophy including the work of Aristotle certain affinities between Ab l Barak t s work and that of more modern scientific conceptions are also examined Containing vast amounts of previously untranslated text Ab l Barak t al Baghd d s Scientific Philosophy sheds new light on the philosopher s scientific theories

particularly with regards to his logical conceptions For this reason the book will be a valuable resource for students and scholars of Jewish and Islamic Philosophy whilst the scientific material will appeal to those studying the history of science

Thought and Things: Experimental logic, or genetic theory of thought James Mark Baldwin,1908 *Logic* Arnold Ruge,Wilhelm Windelband,Josiah Royce,Louis Couturat,Benedetto Croce,Federigo Enriques,Nikolaï Onufrievich Losskiï,1913 Provides the theory in logic knowledge phenomenon the relations of logic and scientific methods ideologies relations and logical methods logic and languages with logic in the aspects of science in valid thinking How I Understand Things PIETER R. VAN WYK,2025-03-31 Have you ever contemplated why things in our world are as they are Thinking about politics philosophy or science perhaps even religion trying to understand our world our place in it and most importantly where we are going The author wrote a discourse between himself and an astute reader explaining how he understand things inviting such a reader to either agree with his understanding or point out an error in his reasoning perhaps even a fatal flaw Criticism already received includes The critique risks alienating readers familiar with philosophy s achievements and weakens the thesis by failing to engage with its complexity The author s rebuttal to this however still stands While recognising the contribution of philosophy the fact remains that in a period of some 2 600 years of philosophical debate and achievements the problems of humanity such as armed conflict hunger and poverty a balanced coexistence between ourselves and our environment has not been solved perhaps it could benefit humanity to re examine the foundation of human perception and knowledge Valid criticism includes the lack of examples of its application to real world issues The author concedes to this but does offer at least thirteen possible projects of enquiry following from his understanding that should offer exactly that However in order to tackle these projects we should agree on the foundation from where such enquiries should take place philosophy and its 2 600 years of effort and failures or an additional not an alternative perspective not from an ivory tower but from a real world perspective Explaining his understanding the author is challenging some long accepted wisdom and dogma and is doing so in plain English even the chapters based on metamathematics are explained in plain English He unequivocally concedes that his understanding is controversial even absurd perhaps but then a fatal flaw in his reasoning should stand out like a sore thumb A fatal flaw that he has not found yet Perhaps an astute reader could find such a flaw a challenging but compelling read for teachers students and practitioners of metaphilosophy metamathematics systems thinking and science politics and economics and those of us who are concerned about the future of humanity
