Frankel, 2012-04-26 The resolution of the sixty year debate over continental drift culminating in the triumph of plate tectonics changed the very fabric of Earth science This four volume treatise on the continental drift controversy is the first complete history of the origin debate and gradual acceptance of this revolutionary theory Based on extensive interviews archival papers and original works Frankel weaves together the lives and work of the scientists involved producing an accessible narrative for scientists and non scientists alike This second volume provides the first extensive account of the growing paleomagnetic case for continental drift in the 1950s and the development of apparent polar wander paths that showed how the continents had changed their positions relative to one

another more or less as Wegener had proposed Paleomagnetism offered the first physical measure that continental drift had occurred and helped determine the changing latitudes of the continents through geologic time *Evolution and its relation to religions thought* Joseph Le Conte,1888 *Human Thought* Joseph Mendola,1997-02-28 Mendola spends little time distinguishing human thought from horse sense and any possible ruminations of other creatures Nor does he acknowledge an distinction between conscious experience and thought content He develops a theory of content for human thought that delineates the things human can think constructs an account of the realization of such thought explains how thoughts with such a range of context might be constituted and how there might be people with such thoughts and argues that no coherent and humanly conceivable account of the realization of our thought is plausible because we cannot plausibly explain our experience He concludes that how we think we think what we think is not how we do in fact think we think Annotation copyrighted by Book News Inc Portland OR **Thought** Walter Sylvester Gamertsfelder,1920 **The Continental Drift Controversy** Henry R. Frankel,2012-04-26 Describes the expansion of the land based paleomagnetic case for drifting continents and recounts the golden age of marine geoscience **Proceedings** Institution of Mechanical Engineers (Great Britain),1895
