The Transition of Agriculture in the Great Plains from 1920 to 1929 ... Flossie Burson, 1934 **Regions in Transition** Rolland Dewing, 2006 Regions in Transition provides an in depth analysis of the dramatic influence of the Great Depression upon the geography politics economics and demography of the Northern Great Plains and Pacific Northwest Author Rolland Dewing who participated in the Dust Bowl migration and has lived more than thirty years in each region brings a unique voice to this history which references evidence from local histories on site visits and interviews scholarly research government documents and local newspapers **Catalogue** Harvard University. Eaton, 1978-06-01 *Contributions in Botany*, 1926 *Many Wests* David M. Wrobel, Michael C. Steiner, 1997 What does it mean to live in the West today Do people tend to identify with states with regions or with the larger West This book examines the development of regional identity in the American West demonstrating that it is a regionally diverse entity made up of many different wests Great Plains Southwest Rocky Mountains and more in which American regionalism finds its fullest expression These fourteen original essays tell how a sense of place emerged among residents of various regions and how a sense of those places was developed by people outside of them Wrobel and Steiner first offer a compelling overview of the West s regional nature then thirteen other rising or renowned scholars from history American Studies geography and literature tell how regional consciousness formed among inhabitants of particular regions All of the essays address the larger issue of the centrality of place in determining social and cultural forms and individual and collective identities Some focus on race and culture as the primary influences on regional consciousness while others emphasize environmental and economic factors or the influence of literature Some even examine western regionalism in areas that lie beyond the West as it has traditionally been conceived Each of the contributors believes that where a people live helps determine what they are and they write not only about the many wests within the larger West but also about the constant state of flux in which regionalism exists Many books speak of the West as a place but few others deal with the West s different places Many Wests presents a vision of the West that reflects both the common heritage and unique character of each major subregion building on the revisionist impulse of the last decade to help redirect New Western History toward an appreciation of regional diversity and integrate scholarship in the regional subfields It is a book for everyone who lives in studies or loves the West for

it confirms that it is home to very different peoples economies histories and regions

Interpretations of Calamity K. Hewitt, 2019-09-18 Originally published in 1983 Interpretations of Calamity provides a provocative critique of the dominant view of research into natural hazards Throughout the world there are now many people professionally engaged in the mitigation and control of risks hazards and the impact of continuing economic development will ensure that they are fully employed There is a wealth of perspectives in the book including weather and wheat yields in the Soviet Union and Canada an historical view of underdevelopment and hazards in Ireland and the impact of a response to drought in southern Africa the Sahel and the Great Plains of the USA The book reflects the major themes of hazards in the context of economic development and social change Most of the case studies are from the rural and agriculture scene This book provides a unique view of the vital importance of food production and of the considerable and sometimes calamitous impact that frost flood storm and drought have on the wellbeing of millions of people and on the stability of the international economic system

The North American West in the Twenty-First Century Brenden W. Rensink, 2022-11 In 1893 Frederick Jackson Turner famously argued that the generational process of meeting and conquering the supposedly uncivilized western frontier is what forged American identity In the late twentieth century new western historians dissected the mythologized western histories that Turner and others had long used to embody American triumph and progress While Turner's frontier is no more the West continues to present America with challenging processes to wrestle navigate and overcome *The North American West in the Twenty First Century* edited by Brenden W Rensink takes stories of the late twentieth century modern West and carefully pulls them toward the present explicitly tracing continuity with or unexpected divergence from trajectories established in the 1980s and 1990s Considering a broad range of topics including environment Indigenous peoples geography migration and politics these essays straddle multiple modern frontiers not least of which is the temporal

frontier between our unsettled past and uncertain future These forays into the twenty first century West will inspire more scholars to pull histories to the present and by doing so reinsert scholarly findings into contemporary public awareness
