**Financial Development in Latin America** Augusto de la Torre, Juan Carlos Gozzi, 2006 This paper argues that the dominant policy paradigm on financial development is increasingly insufficient to address big emerging issues that are particularly relevant for financial systems in Latin America This paradigm was shaped over the past decades by a fundamental shift in thinking toward market based financial development and a complex process of financial crises interpretation The result has been a richly textured policy paradigm focused on promoting financial stability and the convergence to international standards It argues however that there is a growing dissonance between the current paradigm and the emerging issues which is illustrated by discussing challenges in three areas stock markets small and medium enterprise loans and defined contribution pension funds The paper concludes that the dominant policy paradigm is ill suited to provide significant guidance in relation to the big emerging issues It emphasizes the need to take a fresh look at the evidence improve the diagnoses revisit expectations and revise the paradigm World Bank web site Financial Development in Latin America and the Caribbean Augusto de la Torre, Alain Ize, Sergio L. Schmukler, 2011-11-30 The financial systems of Latin America and the Caribbean LAC have been widely resilient to the global financial crisis which reflects strong progress in both macroeconomic management and prudential oversight However the current juncture provides a unique tapestry upon which this book examines several key questions and challenges looking forward Does LAC continue to underperform on some key financial development indicators and if so why How can LAC s financial systems contribute more effectively to the region
