Majority Judgment M. L. Balinski,Rida Laraki,2010 An account of a new theory and method of voting judging and ranking majority judgment shown to be superior to all other known methods In Majority Judgment Michel Balinski and Rida Laraki argue that the traditional theory of social choice offers no acceptable solution to the problems of how to elect to judge or to rank They find that the traditional model transforming the preference lists of individuals into a preference list of society is fundamentally flawed in both theory and practice Balinski and Laraki propose a more realistic model It leads to an entirely new theory and method majority judgment proven superior to all known methods It is at once meaningful resists strategic manipulation elicits honesty and is not subject to the classical paradoxes encountered in practice notably Condorcet s and Arrow s They offer theoretical practical and experimental evidence from national elections to figure skating competitions to support their arguments Drawing on insights from wine sports music and other competitions Balinski and Laraki argue that the question should not be how to transform many individual rankings into a single collective ranking but rather after defining a common language of grades to measure merit how to transform the many individual evaluations of each competitor into a single collective evaluation of all competitors The crux of the matter is a new model in which the traditional paradigm to compare is replaced by a new paradigm to evaluate **Bureau of Educational Research Bulletin** University of Wisconsin.
