Designing solutions requires considering various conditions, such as budget, time, and safety concerns. Sometimes, important trade-offs occur. Challenges, setbacks, and the inability to weigh trade-offs carefully. For example, creating materials for a house that are affordable to build and easy to use, cannot influence the effectiveness of the solution.

After identifying a solution, determining how it works, what conditions affected it, and any compromises that have already been or should involve on the way. Communication, strong critical thinking, and reflecting on the results of the solution are important steps.
