**Saving America** Mark Aesch,2016-10-14 National polling indicates that for the first time in American history people believe their children will not be as well off as they are The primary reason for this The lack of performance by government The public sector receives trillions of American taxpayer dollars every year and yet because of its seeming inability to run effectively government is not delivering the level of service the people are paying for In *Saving America* Mark Aesch tells us where government at the local state and federal level is falling short and offers a coherent non partisan Seven Step plan for rebuilding our nation s public agencies The book is not a political broadside or a theoretical academic tract it s an accessible guidebook that helps local citizens elected officials and administrators make American government great again The Seven Steps process will lead to measurable gains for organizations large and small including school systems municipal governments entire states and even the federal government itself

**Outlook and Independent** ,1912 **The Politics of Evidence** Justin Parkhurst,2016-10-04 The Open Access version of this book available at <http://www.tandfebooks.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 3.0 license There has been an enormous increase in interest in the use of evidence for public policymaking but the vast majority of work on the subject has failed to engage with the political nature of decision making and how this influences the ways in which evidence will be used or misused within political areas This book provides new insights into the nature of political bias with regards to evidence and critically considers what an improved use of evidence would look like from a policymaking perspective Part I describes the great potential for evidence to help achieve social goals as well as the challenges raised by the political nature of policymaking It explores the concern of evidence advocates that political interests drive the misuse or manipulation of evidence as well as counter concerns of critical policy scholars about how appeals to evidence based policy can depoliticise political debates Both concerns reflect forms of bias the first representing technical bias whereby evidence use violates principles of scientific best practice and the second representing issue bias in how appeals to evidence can shift political debates to particular questions or marginalise policy relevant social concerns Part II then draws on the fields of policy studies and cognitive psychology to understand the origins and mechanisms of both forms of bias in relation to political interests and values It illustrates how such biases are not only common but can be much more predictable once we recognise their origins and manifestations in policy arenas Finally Part

III discusses ways to move forward for those seeking to improve the use of evidence in public policymaking It explores what constitutes good evidence for policy as well as the good use of evidence within policy processes and considers how to build evidence advisory institutions that embed key principles of both scientific good practice and democratic representation Taken as a whole the approach promoted is termed the good governance of evidence a concept that represents the use of rigorous systematic and technically valid pieces of evidence within decision making processes that are representative of and accountable to populations served
