Rosenthal,1995 Professor Rosenthal has done her job extremely well In an area in which there are few facts and figures and those that exist are largely held in secrecy she has produced a clear picture of what actually is going on and we should be grateful to her Sir Raymond Hoffenberg Based on qualitative ethnographic research carried out in England and Sweden this book examines a neglected area of professional self regulation It explores the range of informal and quasi formal mechanisms used by doctor colleagues health care managers and professional organizations in attempts to cope with the problem of the incompetent doctor Focused on Consultant Surgeons and senior General Practitioners extensive interviews reveal a repertoire of mechanisms that include amongst others the Frank Talk Protective Support the Veiled Threat being Forced out of the Partnership the attempted Golden Handshake and when all else fails Stalemate and Marginalization Each chapter includes a number of specific cases as well as extensive quotations from those interviewed How information is gathered and assessed the relative success or failure of these mechanisms the factors that determine their use or non use medical perceptions of mistakes and the changing attitudes of the public are examined The book includes a discussion of current changes in the National Health Service and their likely impact on these issues and quality assurance in medical care Some comparisons with the informal processes in Sweden provide insight into the universality of the informal mechanisms The book ends with a proposal for a total integrated peer review system that recognizes and strengthens the informal mechanisms and links them to systematic clinical practice analysis and other efforts that enhance the medical profession s commitment to effective self regulation **The Poultry Tribune** ,1912 **Raising Achievement in Secondary Mathematics** Anne Watson,2006-06 This book argues for changed attitudes towards low attaining students in secondary mathematics Certain social groups regularly underachieve in mathematics so attainment is seen as an issue of social justice

The way that assessment testing teaching and grouping decisions in mathematics can confirm a cycle of low attainment is carefully described with well founded arguments based on many years experience and research Anne Watson offers an alternative view of attainment and capability based on real classroom incidents in which low attaining students show themselves to be able to think about mathematics in quite sophisticated ways She argues that teaching could be based on learners proficiency rather than seen as correcting or confirming deficits in knowledge and behaviour She describes how a group of teachers who believed that their students could do better with higher expectations developed a range of principles and strategies which supported their work the students showed significant progress and the teachers felt they were doing a better job This book is for anyone who is in a position to challenge existing practice in mathematics teaching either in their own classroom or in the broader cultures of teaching It offers the arguments the knowledge and the support for changing practice in a non judgemental practical but well founded way
