Exploring Getting Started with Computing Concepts Mary Anne Poatsy, Robert Grauer, 2017 This is a one chapter book that gives a brief overview of fundamental computer concepts like hardware software security and networking The goal of the Exploring series is to move students beyond the point and click to understanding the why and how behind each skill

Exploring Getting Started with Computing Concepts Mary Anne Poatsy, Robert Grauer, TBD Author, 2016-10-24 This is the eBook of the printed book and may not include any media website access codes or print supplements that may come packaged with the bound book This is a one chapter book that gives a brief overview of fundamental computer concepts like hardware software security and networking Beyond point and click The goal of the Exploring series is to move students beyond the point and click to understanding the why and how behind each skill And because so much learning takes place outside of the classroom this series provides learning tools that students can access anywhere anytime Students go to college now with a different set of skills than they did years ago With this in mind the Exploring series seeks to move students beyond the basics of the software at a faster pace without sacrificing coverage of the fundamental skills that everyone needs to know Also available with MyITLab MyITLab is an online homework tutorial and assessment program designed for Information Technology IT courses which engages students and improves results HTML5 Simulation exercises and Live in Application Grader projects come with the convenience of auto grading and instant feedback helping students learn more quickly and effectively Digital badges lets students showcase their Microsoft Office or Computer Concepts competencies keeping them motivated and focused on their future careers MyITLab builds the critical skills needed for college and career success Note You are purchasing a standalone product MyITLab does not come packaged with this content Students if interested in purchasing this title with MyITLab ask your instructor for the correct package ISBN and Course ID Instructors contact your Pearson representative for more information

Getting Started with Computing Concepts Pamela R. Toliver, Shelley Gaskin, 2003-12 For Introductory Computer courses in Microsoft Office 2003 or courses in Computer Concepts with a lab component for Microsoft Office 2003 applications Teach the course YOU want in LESS TIME The primary goal of the GO Series aside from teaching computer applications is ease of implementation with an approach that is based on clearly defined projects for students and a one of a kind supplements package

Go! with Basic Computer Concepts Shelley Gaskin, Diane Coyle, 2008 For Introductory Computer courses in Microsoft Office 2007 or courses in Computer Concepts with a lab component for Microsoft Office 2007 applications Teach the course YOU want in LESS TIME The primary goal of the GO

Series aside from teaching computer applications is ease of implementation with an approach that is based on clearly defined projects for students and a one of a kind supplements package *Getting Started with Computing Concepts*, 2003 **Your Office** Amy Kinser, Patti Hammerle, 2012 For introductory computer courses on Microsoft Office 2010 or courses in computer concepts with a lab component for Microsoft Office 2010 applications Your Office is the Office Applications textbook written for instructors who want more than a skill drill book that enables students to learn discreet tasks but fails to illustrate the big picture of how these skills work together Your Office bridges the gap between skill and application and empowers students to master Office 2010 as a tool to solve problems and make decisions The cases progress students from learning the skills in each Office Application to using the applications as tools to make business decisions The unique modular structure provides a strong foundation for students through practice in each workshop and then synthesizes the objectives covered over two workshops challenging students to really retain what they learned as opposed to learning and then forgetting soon after The series scenario introduces a large global business the resort and spa made up of smaller businesses golf pro shop spa restaurants event planning etc featured in the cases that run throughout all four applications This approach gives students a solid understanding of how an organization works by exposing them to how individuals in all facets of a business interact with tools like Microsoft Office and use information to make decisions For a behind the scenes look at Your Office visit <http://www.youtube.com/user/YourOffice2010> This is a one chapter supplement *Computers* Larry E. Long, Nancy Long, 2002 This work is an introductory course in computers and information technology or in computer competency often offered in Business CIS or Computer Science Designed to aid the competency needs of students this text supplements package provides an overview of computing concepts and IT applications all in a format that allows instructors the flexibility to meet their course s education objectives It aims to strike a balance between efficiency of presentation and content that holds the student s interest and invites learning Only topics critical to general information technology competency are covered in order to provide the breadth of topics necessary to the understanding that is applicable today and in the future The text includes an extended presentation of ethics in IT and explores IT laboratories **GO! with Computer Concepts Getting Started** Jill Carney, Shelley Gaskin, 2013-07-05 For use in the Computer Concepts course This book is also suitable for students and individuals seeking an introduction to computer concepts The primary goal of the GO Series aside from teaching computer applications is ease of implementation with an approach that is based on clearly defined projects Teaching and Learning Experience This program will provide a better teaching and learning experience for you and your students Here s how Personalize Learning MyITLab delivers proven results in helping students succeed provides engaging experiences that personalize learning and comes from a trusted partner with educational expertise and a deep commitment to helping students and instructors achieve their goals Engage Students with a Project Based Approach GO s project based approach teaches students to solve real problems as they practice and learn the features Motivate Students with Clear Instruction

Based on professor and student feedback this text has been designed to offer clear instruction for full student comprehension Teach the Course You Want in Less Time The GO series one of a kind instructional system provides you with everything you need to prepare for class teach the material and assess your students Computing for Ordinary Mortals Robert St. Amant,2012-10-29 In Computing for Ordinary Mortals cognitive scientist and AI expert Robert St Amant explains what he calls the really interesting part of computing which are the ideas behind the technology They re powerful ideas and the foundations for everything that computers do but they are little discussed This book will not tell you how to use your computer but it will give you a conceptual tour of how it works Some of the ideas like modularity which are so embedded in what we do as humans can also give us insight into our own daily activities how we interact with other people and in some cases even what s going on in our heads Computing is all around us and to quote Richard Hamming the influential mathematician and computer scientist The purpose of computing is insight not numbers and it is this insight that informs the entire book *Social Computing: Concepts, Methodologies, Tools, and Applications* Dasgupta, Subhasish,2009-11-30 Uncovers the growing and expanding phenomenon of human behavior social constructs and communication in online environments InfoWorld ,1983-09-19 InfoWorld is targeted to Senior IT professionals Content is segmented into Channels and Topic Centers InfoWorld also celebrates people companies and projects **Getting Started** Deborah Morley,1999 Over the last few years Internet and World Wide Web use has skyrocketed and consequently many are interested in developing a Web site for personal or business use Though creating a Web site has in the past been very complicated and primarily left to computer professionals the introduction of Web publishing programs such as Microsoft FrontPage 98 has made Web site creation a possibility for almost anyone While many computer books are enormous and difficult to read Getting Started Web Page Design with Microsoft FrontPage 98 is concise and readable It begins with the essential information a Web page designer needs to become familiar with the World Wide Web and basic Web page design fundamentals and then covers how to create complete Web sites all in six concise chapters **Getting Started: Journey to Modernization with IBM Z** Makenzie Manna,Ravinder Akula,Matthew Cousens,Pabitra Mukhopadhyay,Anand Shukla,IBM Redbooks,2021-03-15 Modernization of enterprise IT applications and infrastructure is key to the survival of organizations It is no longer a matter of choice The cost of missing out on business opportunities in an intensely competitive market can be enormous To aid in their success organizations are facing increased encouragement to embrace change They are pushed to think of new and innovative ways to counter or offer a response to threats that are posed by competitors who are equally as aggressive in adopting newer methods and technologies The term modernization often varies in meaning based on perspective This IBM Redbooks publication focuses on the technological advancements that unlock computing environments that are hosted on IBM Z to enable secure processing at the core of hybrid This publication is intended for IT executives IT managers IT architects System Programmers and Application Developer professionals **Exploring** Gretchen Marx,2004 For

Introductory Computer courses in Microsoft Office 2003 or courses in Computer Concepts with a lab component for Microsoft Office 2003 applications Master the How and Why of Office 2003 Students master the How and Why of performing tasks in Office and gain a greater understanding of how to use the individual applications together to solve business problems *Getting Started with Computing Concepts* Robert T. Grauer, Lynn Hogan, Mary Anne Poatsy, 2010 For introductory computer courses on Microsoft Office 2007 or courses in computer concepts with a lab component for Microsoft Office 2007 applications The goal of the Exploring series has been to move students beyond the point and click helping them understand the why and how behind each skill This is a one chapter supplement that will be available through Pearson s Custom PHIT Library **Adventures In Raspberry Pi** Carrie Anne Philbin, 2013-12-03 Coding for kids is cool with Raspberry Pi and this elementary guide Even if your kids don t have an ounce of computer geek in them they can learn to code with Raspberry Pi and this wonderful book Written for 11 to 15 year olds and assuming no prior computing knowledge this book uses the wildly successful low cost credit card sized Raspberry Pi computer to explain fundamental computing concepts Young people will enjoy going through the book s nine fun projects while they learn basic programming and system administration skills starting with the very basics of how to plug in the board and turn it on Each project includes a lively and informative video to reinforce the lessons It s perfect for young eager self learners your kids can jump in set up their Raspberry Pi and go through the lessons on their own Written by Carrie Anne Philbin a high school teacher of computing who advises the U K government on the revised ICT Curriculum Teaches 11 to 15 year olds programming and system administration skills using Raspberry Pi Features 9 fun projects accompanied by lively and helpful videos Raspberry Pi is a 35 25 credit card sized computer created by the non profit Raspberry Pi Foundation over a million have been sold Help your children have fun and learn computing skills at the same time with **Adventures in Raspberry Pi** **Exploring Getting Started with Computing Concepts** Robert T. Grauer, 2007 *Software Engineering 3* Dines Bjørner, 2006-06-29 The art craft discipline logic practice and science of developing large scale software products needs a believable professional base The textbooks in this three volume set combine informal engineeringly sound practice with the rigour of formal mathematics based approaches Volume 3 is based on the maxim Before software can be designed its requirements must be well understood and before the requirements can be expressed properly the domain of the application must be well understood This book covers the process from the development of domain descriptions via the derivation of requirements prescriptions from domain models to the refinement of requirements into software designs i e architectures and component design Emphasis is placed on what goes into proper domain descriptions and requirements prescriptions how one acquires and analyses the domain knowledge and requirements expectations and how one validates and verifies domain and requirements models The reader can take an informal route through Vol 3 and this would be suitable for undergraduate courses on software engineering Advanced students lecturers and researchers may instead follow the formal route through Vol 3 and in

this case Vol 1 is a prerequisite text Lecturers will be supported with a comprehensive guide to designing modules based on the textbooks with solutions to many of the exercises presented and with a complete set of lecture slides
