When a teaspoon of soil contains millions of species and when we pave over the earth on a daily basis what does that mean for our future What is the risk to our food supply the planet s wildlife the soil on which every life form depends How much undeveloped untrodden ground do we even have left Paul Bogard set out to answer these questions in *The Ground Beneath Us* and what he discovered is astounding From New York where more than 118 000 000 tons of human development rest on top of Manhattan Island to Mexico City which sinks inches each year into the Aztec ruins beneath it Bogard shows us the weight of our cities footprints And as we see hallowed ground coughing up bullets at a Civil War battlefield long hidden remains emerging from below the sites of concentration camps the dangerous alluring power of fracking the fragility of the giant redwoods our planet s oldest living things the surprises hidden under a Major League ballpark s grass and the sublime beauty of our few remaining wildest places one truth becomes blazingly clear The ground is the easiest resource to forget and the last we should Bogard s *The Ground Beneath Us* is deeply transporting reading that introduces farmers geologists ecologists cartographers and others in a quest to understand the importance of something too many of us take for granted dirt From growth and life to death and loss and from the subsurface technologies that run our cities to the dwindling number of idyllic Edens that remain this is the fascinating story of the ground beneath our feet **Controversial Monuments and Memorials** David B. Allison,2023-09-02

The impetus for the first edition was violent actions the white supremacist rally in Charlottesville Virginia in 2017 which was touched off by discussions about removing a statue to Robert E Lee and resulted in the death of Heather Heyer Since the publication of the first edition both history and democracy are being threatened in ways that we were only seeing small glimpses of in 2018 Today attempts to elevate new or more complex history has been met with vilification States across the country have passed legislation to ban critical race theory from being taught in public schools and are seeking ways to limit what teachers are allowed to teach about slavery and race in the United States These threats are unlikely to abate As such our responsibility as historians community leaders museum professionals and citizens is to redouble our efforts to share human stories in relatable ways and to exercise our rights and wield our power whenever and however we can The revised edition tackles the great issues of our time against the backdrop of monument culture and historical truth **North & South** ,2005 *Journey Through Hallowed Ground* David Lillard,2006 For history buffs visit more than 100 historical sites down The Old Carolina Road US Route 15 from Gettysburg Pennsylvania through Maryland to Charlottesville Virginia PLUS where to stay and where to eat along the way *Ghosts of Gettysburg* Dave Oester,Sharon Oester,2007-05
