Women's Music for the Screen Felicity Wilcox,2021-08-26 Women s Music for the Screen Diverse Narratives in Sound shines a long overdue light on the works and lives of female identifying screen composers Bringing together composer profiles exclusive interview excerpts and industry case studies this volume showcases their achievements and reflects on the systemic gender biases women have faced in an industry that has long excluded them Across 16 essays an international array of contributors present a wealth of research data biographical content and musical analysis of film television and video game scores to understand how the industry excludes women the consequences of these deficits and why such inequities persist and to document women s rich contributions to screen music in diverse styles and genres The chapters amplify the voices of women composers including Bebe Barron Delia Derbyshire Wendy Carlos Anne Dudley Rachel Portman Hildur Gu nad ttir Mica Levi Winifred Phillips and more From the mid twentieth century to the present and from classic Hollywood scores to pioneering electronic music these are the stories and achievements of the women who have managed to forge successful careers in a male dominated arena Suitable for researchers educators and students alike Women s Music for the Screen urges the screen music industry to consider these sounds and stories in a way it hasn t before as voices that more accurately reflect the world we all share **Sounding the Limits of Life** Stefan Helmreich,2015-10-27 What is life What is water What is sound In Sounding the Limits of Life anthropologist Stefan Helmreich investigates how contemporary scientists

biologists oceanographers and audio engineers are redefining these crucial concepts Life water and sound are phenomena at once empirical and abstract material and formal scientific and social In the age of synthetic biology rising sea levels and new technologies of listening these phenomena stretch toward their conceptual snapping points breaching the boundaries between the natural cultural and virtual Through examinations of the computational life sciences marine biology astrobiology acoustics and more Helmreich follows scientists to the limits of these categories Along the way he offers critical accounts of

such other than human entities as digital life forms microbes coral reefs whales seawater extraterrestrials tsunamis seashells and bionic cochlea He develops a new notion of sounding as investigating fathoming listening to describe the form of inquiry appropriate for tracking meanings and practices of the biological aquatic and sonic in a time of global change and climate crisis Sounding the Limits of Life shows that life water and sound no longer mean what they once did and that what count as their essential natures are under dynamic revision
