Forestry In Development Planning:

Forestry in Development Planning Harry W. Blair, 2019-04-11 This book explores some of the relationship between forestry and rural development focusing on lessons that the overall experience in rural development might have for social forestry It examines a single social forestry project to see how it would look from a rural development perspective

Forestry in Development Planning Harry W. Blair, H.W. and Olpadwala, P.D., 1988-01-01 Part 1 Introduction Part 2 Constraints to development limits to change Part 3 Tackling the constraints development initiatives Part 4 Fitting forestry and rural development together

Forest Plans of North America Jacek P. Siry, Pete Bettinger, Krista Merry, Donald L. Grebner, Kevin Boston, Chris Cieszewski, 2015-03-13 Forest Plans of North America presents case studies of contemporary forest management plans developed for forests owned by federal state county and municipal governments communities families individuals industry investment organizations conservation organizations and others in the United States Canada and Mexico The book provides excellent real life examples of contemporary forest planning processes the various methods used and the diversity of objectives and constraints faced by forest owners Chapters are written by those who have developed the plans with each contribution following a unified format and allowing a common clear presentation of the material along with consistent treatment of various aspects of the plans This work complements other books published by members of the same editorial team Forest Management and Planning Introduction to Forestry and Natural Resource Management which describe the planning process and the various methods one might use to develop a plan but in general do not as this work does illustrate what has specifically been developed by landowners and land managers This is an in depth compilation of case studies on the development of forest management plans by the different landowner groups in North America The book offers students practitioners policy makers and the general public an opportunity to greatly improve their appreciation of forest management and more importantly foster an understanding of why our forests today are what they are and what forces and tools may shape their tomorrow Forest Plans of North America provides a solid supplement to those texts that are used as learning tools for forest management courses In addition the work functions as a reference for the types of processes used and issues addressed in the early 21st century for managing land resources Presents 40 50 case studies of forest plans developed for a wide variety of organizations groups and landowners in North America Illustrates plans that have specifically been developed by landowners and land managers Features engaging clearly written content that is accessible rather than highly technical while demonstrating the issues and methods involved in the development of the plans Each chapter contains color photographs maps and figures

Forestry Sector Plans Paul V. Ellefson, 1985

Vietnam Forestry Development Strategy Trieu, V.H., Pham, T.T., Đào Thị, L.C., 2020-12-18 The Vietnam Forestry Development Strategy VFDS is one of the country's most important plans for the forestry sector The strategic directions objectives and solutions within it differ from time to time depending on the political goals and perspectives of the moment as well as the role that the forestry sector plays

in Vietnam's overall socio-economic development. Regardless of such changes, inheriting lessons learned, developing the next strategy off the back of the experience gained from solving previous challenges and taking advantage of opportunities are always the top priorities of the Government of Vietnam. This report is the result of a collaboration between the Center for International Forestry Research (CIFOR) and the Vietnam Administration of Forestry (VNFOREST); it is intended to provide VNFOREST with input as they develop the new strategy. Based on secondary document research and stakeholder interviews, the report reviews achievements and challenges in the implementation of VFDS 2006-2020 as well as provides recommendations for policy makers to consider in the process of developing the new strategy. Research results show that by 2020 Vietnam had exceeded a number of the goals set out in VFDS 2006-2020, including: i) accelerating the growth of production value in the sector; ii) increasing the export value of wood and forest products; iii) increasing domestic wood production; and iv) planting protection forest (PTF) and special use forests (SUF). However, the forestry sector still faces many challenges when it comes to other key performance indicators, such as: i) increasing the area of production forests (PDF) with certification of sustainable forest management (SFM); ii) increasing large diameter timber production; iii) increasing revenue for forest environmental services (FES); iv) securing forest and forest land for the purposes of allocation and leases; v) reducing the number of poor households in forestry areas; and vi) increasing the rate at which forestry workers are trained. Although some anticipated targets were not achieved, others were exceeded, for example, forest cover, reforestation after logging, reduction of forest protection violations, and scattered tree planting. That these goals were achieved or exceeded is the result of strong political commitment, policies, trend matching, the market, improvements in central and local management capacity, the active support of international donors, and the involvement of civil society and the private sector. That some targets were not achieved is due to the challenges of implementing policy effectively, efficiently, and equitably at grassroots level, lack of resources and funding, and some ambitious goals and targets not being realistic in the current economic, political, and market contexts. Addressing these challenges requires a new approach and more effective economic, social, and technical solutions. Development of VFDS 2021-2030 and the 2050 vision needs to consider the implementation achievements and challenges of the previous policy, as well as how to align with global trends and balance these with the current political, economic, and social development context in Vietnam. The direction of the new strategy must also be considered in the context of international requirements to facilitate the mobilization of domestic and foreign financial resources to help modernize the industry, as well as enhance the forestry sector's role and value in terms of poverty reduction, sustainable economic development, and ensuring sustainable forest ecosystems.

Importance of Forestry Statistics in Development Planning Tian Ser Tan, 1984 **An**

Introduction to Planning Forestry Development Food and Agriculture Organization of the United Nations, 1974 *The Conservation Atlas of Tropical Forests* N. Mark Collins, 1991-06-18

The first of a series designed to cover all tropical rain forests in the world. This is a visual portfolio of detailed maps of Asia, accompanied by a text which seeks to analyze the extent

and causes of deforestation and to point a way towards sustainable forest development Tongass National Forest (N.F.), Land Management Plan Revision: Environmental Impact Statement, 1997 **Forestry Development in South Africa and Annual Report** South Africa. Department of Forestry, 1928 **Development Plan** Swaziland, 2009 *Indian Forest Management*, Forest Hill Park, a Report on the Proposed Landscape Development Albert Davis Taylor, 1938 **Working Plan for a Communal Forest for the Town of Ithaca, New York** John S. Everitt, 1921 *American Forestry*, 1922 Journal of Forestry, 1918 List of members of the society in v 15 **Nontimber Forest Products in the United States** Eric T. Jones, Rebecca Jean McLain, James F. Weigand, 2002 A quiet revolution is taking place in America's forests. Once seen primarily as stands of timber, our woodlands are now prized as a rich source of a wide range of commodities from wild mushrooms and maple sugar to hundreds of medicinal plants whose uses have only begun to be fully realized. Now as timber harvesting becomes more mechanized and requires less labor, the image of the lumberjack is being replaced by that of the forager. This book provides the first comprehensive examination of nontimber forest products (NTFPs) in the United States, illustrating their diverse importance, describing the people who harvest them, and outlining the steps that are being taken to ensure access to them. As the first extensive national overview of NTFP policy and management specific to the United States, it brings together research from numerous disciplines and analytical perspectives such as economics, mycology, history, ecology, law, entomology, forestry, geography, and anthropology in order to provide a cohesive picture of the current and potential role of NTFPs. The contributors review the state of scientific knowledge of NTFPs by offering a survey of commercial and noncommercial products, an overview of uses and users, and discussions of sustainable management issues associated with ecology, cultural traditions, forest policy, and commerce. They examine some of the major social, economic, and biological benefits of NTFPs while also addressing the potential negative consequences of NTFP harvesting on forest ecosystems and on NTFP species populations. Within this wealth of information are rich accounts of NTFP use drawn from all parts of the American landscape, from the Pacific Northwest to the Caribbean. From honey production to a review of nontimber forest economies still active in the United States, such as the Ojibway harvest of plants, recounted here, the book takes in the whole breadth of recent NTFP issues, including ecological concerns associated with the expansion of NTFP markets and NTFP tenure issues on federally managed lands. No other volume offers such a comprehensive overview of NTFPs in North America. By examining all aspects of these products, it contributes to the development of more sophisticated policy and management frameworks for not only ensuring their ongoing use but also protecting the future of our forests.
