Harold L. Levin

Geologic Time:

A Geologic Time Scale 1989 Walter Brian Harland, 1990-06-29 A concentrated review of the time scales used in geology in order to date stratigraphic sequences and to define geological epochs It is the planned successor to *A Geologic Timescale* and adopts the same style and employs similar methods

The Earth Through Time Harold L. Levin, 2009-10-05 This best selling historical geology text provides geologists with an excellent balance of basic geology and paleontology The ninth edition presents rich authoritative coverage of the history of the Earth offering the most comprehensive history in the discipline today It maintains its strong approach to stratigraphy and paleontology that other texts have lost The text's paleogeographic maps are excellent in detail and are a vital component in understanding the earth's history Stunning artwork brings the ancient world to life *Geology of National Parks* boxes encourage them to visit these parks to appreciate their geological significance Geologists will also appreciate the questions about past geologic events and the processes used in finding answers

A Geologic Time Scale 2004 Felix M. Gradstein, James George Ogg, Alan Gilbert Smith, 2004 An international team of over forty stratigraphic experts have helped to build the most up to date international stratigraphic framework for the Precambrian and Phanerozoic This successor to *A Geologic Time Scale 1989* by W Brian Harland et al CUP 0521 387655 begins with an introduction to the theory and methodology behind the construction of the new time scale The main part of the book is devoted to the scale itself systematically presenting the standard subdivisions at all levels using a variety of correlation markers Extensive use is made of isotope geochronology geomathematics and orbital tuning to produce a standard geologic scale of unprecedented detail and accuracy with a full error analysis A wallchart summarising the whole time scale with paleogeographic reconstructions throughout the Phanerozoic is included in the back of the book The time scale will be an invaluable reference source for academic and professional researchers and students

Iowa's Geological Past Wayne I. Anderson, 1998 Iowa's rock record is the product of more than three billion years of geological processes The state endured multiple episodes of continental glaciation during the Pleistocene Ice Age and the last glacier retreated from Iowa a mere geologically speaking twelve thousand years ago Prior to that dozens of seas came and went leaving behind limestone beds with rich fossil records Lush coal swamps salty lagoons briny basins enormous alluvial plains ancient rifts and rugged Precambrian mountain belts all left their mark In *Iowa's Geological Past* Wayne Anderson gives us an up to date and well informed account of the state's vast geological history from the Precambrian through the end of the Great Ice Age Anderson takes us on a journey backward into time to explore Iowa's rock and sediment record In the distant past prehistoric Iowa was covered with shallow seas coniferous forests flourished in areas beyond the continental glaciers and a wide variety of animals existed including mastodon mammoth musk ox giant beaver camel and giant sloth The presence of humans can be traced back to the Paleo Indian interval 9 500 to 7 500 years ago Iowa in Paleozoic time experienced numerous coastal plain and shallow marine environments Early in the Precambrian Iowa was part of ancient mountain belts in which granite and

other rocks were formed well below the earth's surface. The hills and valleys of the Hawkeye State are not everlasting when viewed from the perspective of geologic time. Overall Iowa's geologic column records an extraordinary transformation over more than three billion years. Wayne Anderson's profusely illustrated volume provides a comprehensive and accessible survey of the state's remarkable geological past.

Geology and Ground-water Chemistry, Curlew Valley, Northwestern Utah and South-Central Idaho, Implications for Hydrogeology Hugh A. Hurlow, Neil I. Burk, 2008. This report 185 pages and 2 plates presents new and compiled geologic geophysical hydrologic and hydrochemical data to delineate the regional ground water flow system in Curlew Valley. Decreased precipitation combined with increased agricultural pumping in the central part of Curlew Valley since the late 1960s caused a steady decline in discharge at the Locomotive Springs complex. The report includes a compiled geologic map of the Curlew Valley surface drainage basin at 1:100,000 scale and new geologic and hydrochemical data.

Physical Geology Today Damian Nance, Brendan E. Murphy, 2016. This text presents a clear and conceptual understanding of how Earth works emphasizing the role of tectonic plates throughout. Using clear focused and engaging prose the authors discuss connections between concepts processes and principles in a straightforward manner. The text introduces themes using stunning overview graphics at the beginning of each chapter and features hundreds of meticulously developed figures throughout in order to illustrate ongoing processes and changes over time.
