The Dimensions of Global Citizenship Darren J. O'Byrne,2004-11-23 *The Dimensions of Global Citizenship* takes issue with the assumption that ideas about global citizenship are merely Utopian ideals The author argues that far from being a modern phenomenon world citizenship has existed throughout history as a radical alternative to the inadequacies of the nation state system Only in the post war era has this ideal become politically meaningful This social transformation is illustrated by references to the activities of global social movements as well as those of individual citizens

Deconstructing Global Citizenship Hassan Bashir,Phillip W. Gray,2015-10-30 The success of individual nation states today is often measured in terms of their ability to benefit from and contribute to a host of global economic political socio cultural technological and educational networks This increased multifaceted international inter dependence represents an intuitively contradictory and an immensely complex situation This scenario requires that national governments whose primary responsibility is towards their citizenry must relinquish a degree of control over state borders to constantly developing trans and multinational regimes and institutions Once state borders become permeable all sorts of issues related to rights earned or accrued due to membership of a national community come into question Given that neither individuals nor states can eschew the influence of the growing interdependence this new milieu is often described in terms of shrinking of the world into a global village This reshaping of

the world requires us to broaden our horizons and re evaluate the manner in which we theorize human personhood within communal boundaries It also demands us to acknowledge that the relative decline of Euro American economic and political influence and the rise of Asian and Latin American states at the global level have created spaces in which a de territorialized and a de historicized notion of citizenship and state can now be explored The essays in this volume represent diverse disciplinary analytical and methodological approaches to understand what the implications are of being a citizen of both a nation state and the world simultaneously In sum *Deconstructing Global Citizenship* explores the question of whether a synthesis of contradictory national and global tendencies in the term global citizenship is even possible or if we are better served by fundamentally reconsidering our ideas of citizenship community and politics

The Global Citizenship Nexus Debra Chapman, Tania Ruiz-Chapman, Peter Eglin, 2020-04-08 In the spirit of Ivan Illich's 1968 speech *To Hell with Good Intentions* the book takes aim at a ubiquitous form of contemporary ideology namely the concept of global citizenship Its characteristic discourse can be found inhabiting a nexus of four complexes of ruling institutions namely universities with their international service learning the United Nations and allied international institutions bent on global citizenship education international non governmental organizations and foundations promoting social entrepreneurship and global corporations and their mouthpieces pitching corporate social responsibility and sustainable development The question is in the context of Northern or Western imperialism and US led neoliberal global corporate capitalism and the planetary Armageddon they are wringing what is the concept of global citizenship doing for these institutions The studies in the book put this question to each of these four institutional complexes from broadly political economic and post colonial premises focusing on the concept's discursive use against the background of the mounting production of the global non citizen as the global citizen's other Addressed to all users of the concept of global citizenship from university students and faculty in global studies to social entrepreneurs and United Nations bureaucrats the book's studies ultimately ask whether the idea helps or hinders the global quest for social and economic justice

Globalization and Global Citizenship Irene Langran, Tammy Birk, 2016-06-10 *Globalization and Global Citizenship* examines the meaning and realities of global citizenship as a manifestation of recent trends in globalization In an interdisciplinary approach the chapters outline and analyse the most significant dimensions of global citizenship including transnational historical and cultural variations in its practice foreign and domestic policy influences and its impact on personal identities The contributions ask and explore questions that are of immediate relevance for today's scholars including How does globalization in its current form present a new set of challenges for states non state actors and individual citizens How has globalization diminished expanded or complicated notions of citizenship What rights could exist outside the context of state

sovereignty How can social accountability be imagined beyond the borders of towns cities or states What forms of political representational legitimacy could be productive on the global level When is it useful possible or desirable for individuals to identify with global political communities Drawing together a broad range of contributors and cutting edge research the volume offers chapters that seek to reflect the full spectrum of approaches and topics providing a valuable resource which highlights the value of an extended and thoughtful study of the idea and practice of global citizenship within a broader consideration of the processes of globalization It will be of great use to graduates and scholars of international relations sociology and global studies affairs as well as globalization
