ELEMENTS OF DESIGN
quick reference sheet

LINE
Lines are fundamental to design. They are used to define shapes, create patterns, and establish a sense of movement and direction. Lines can be straight, curved, thick, or thin, and they can be used to create a variety of effects.

SHAPE
Shapes are two-dimensional forms that are defined by lines or boundaries. They can be geometric (like squares, circles, and triangles) or organic (like leaves and clouds). Shapes are used to create visual interest and to define the form of objects.

VALUE
Value refers to the lightness or darkness of a color. It is used to create depth and contrast in a design. A gradient from light to dark is a common way to show value.

COLOR
Color is one of the most powerful tools in design. It can be used to create mood, attract attention, and communicate information. Color theory is the study of how colors interact and how they can be used effectively.

TEXTURE
Texture is the visual quality of a surface. It can be created through the use of patterns, lines, and colors. Texture can be used to make a design feel more tactile and to add visual interest.

SIZE
Size refers to the relative dimensions of elements in a design. It is used to create hierarchy and to draw attention to important elements. Larger elements are typically more important than smaller ones.

SPACE
Space is the area around and between elements in a design. It is used to create balance and to make a design feel clean and organized. Good use of space is essential for effective design.
